

# Video Service Technical Architecture Diagram

## Project Setup

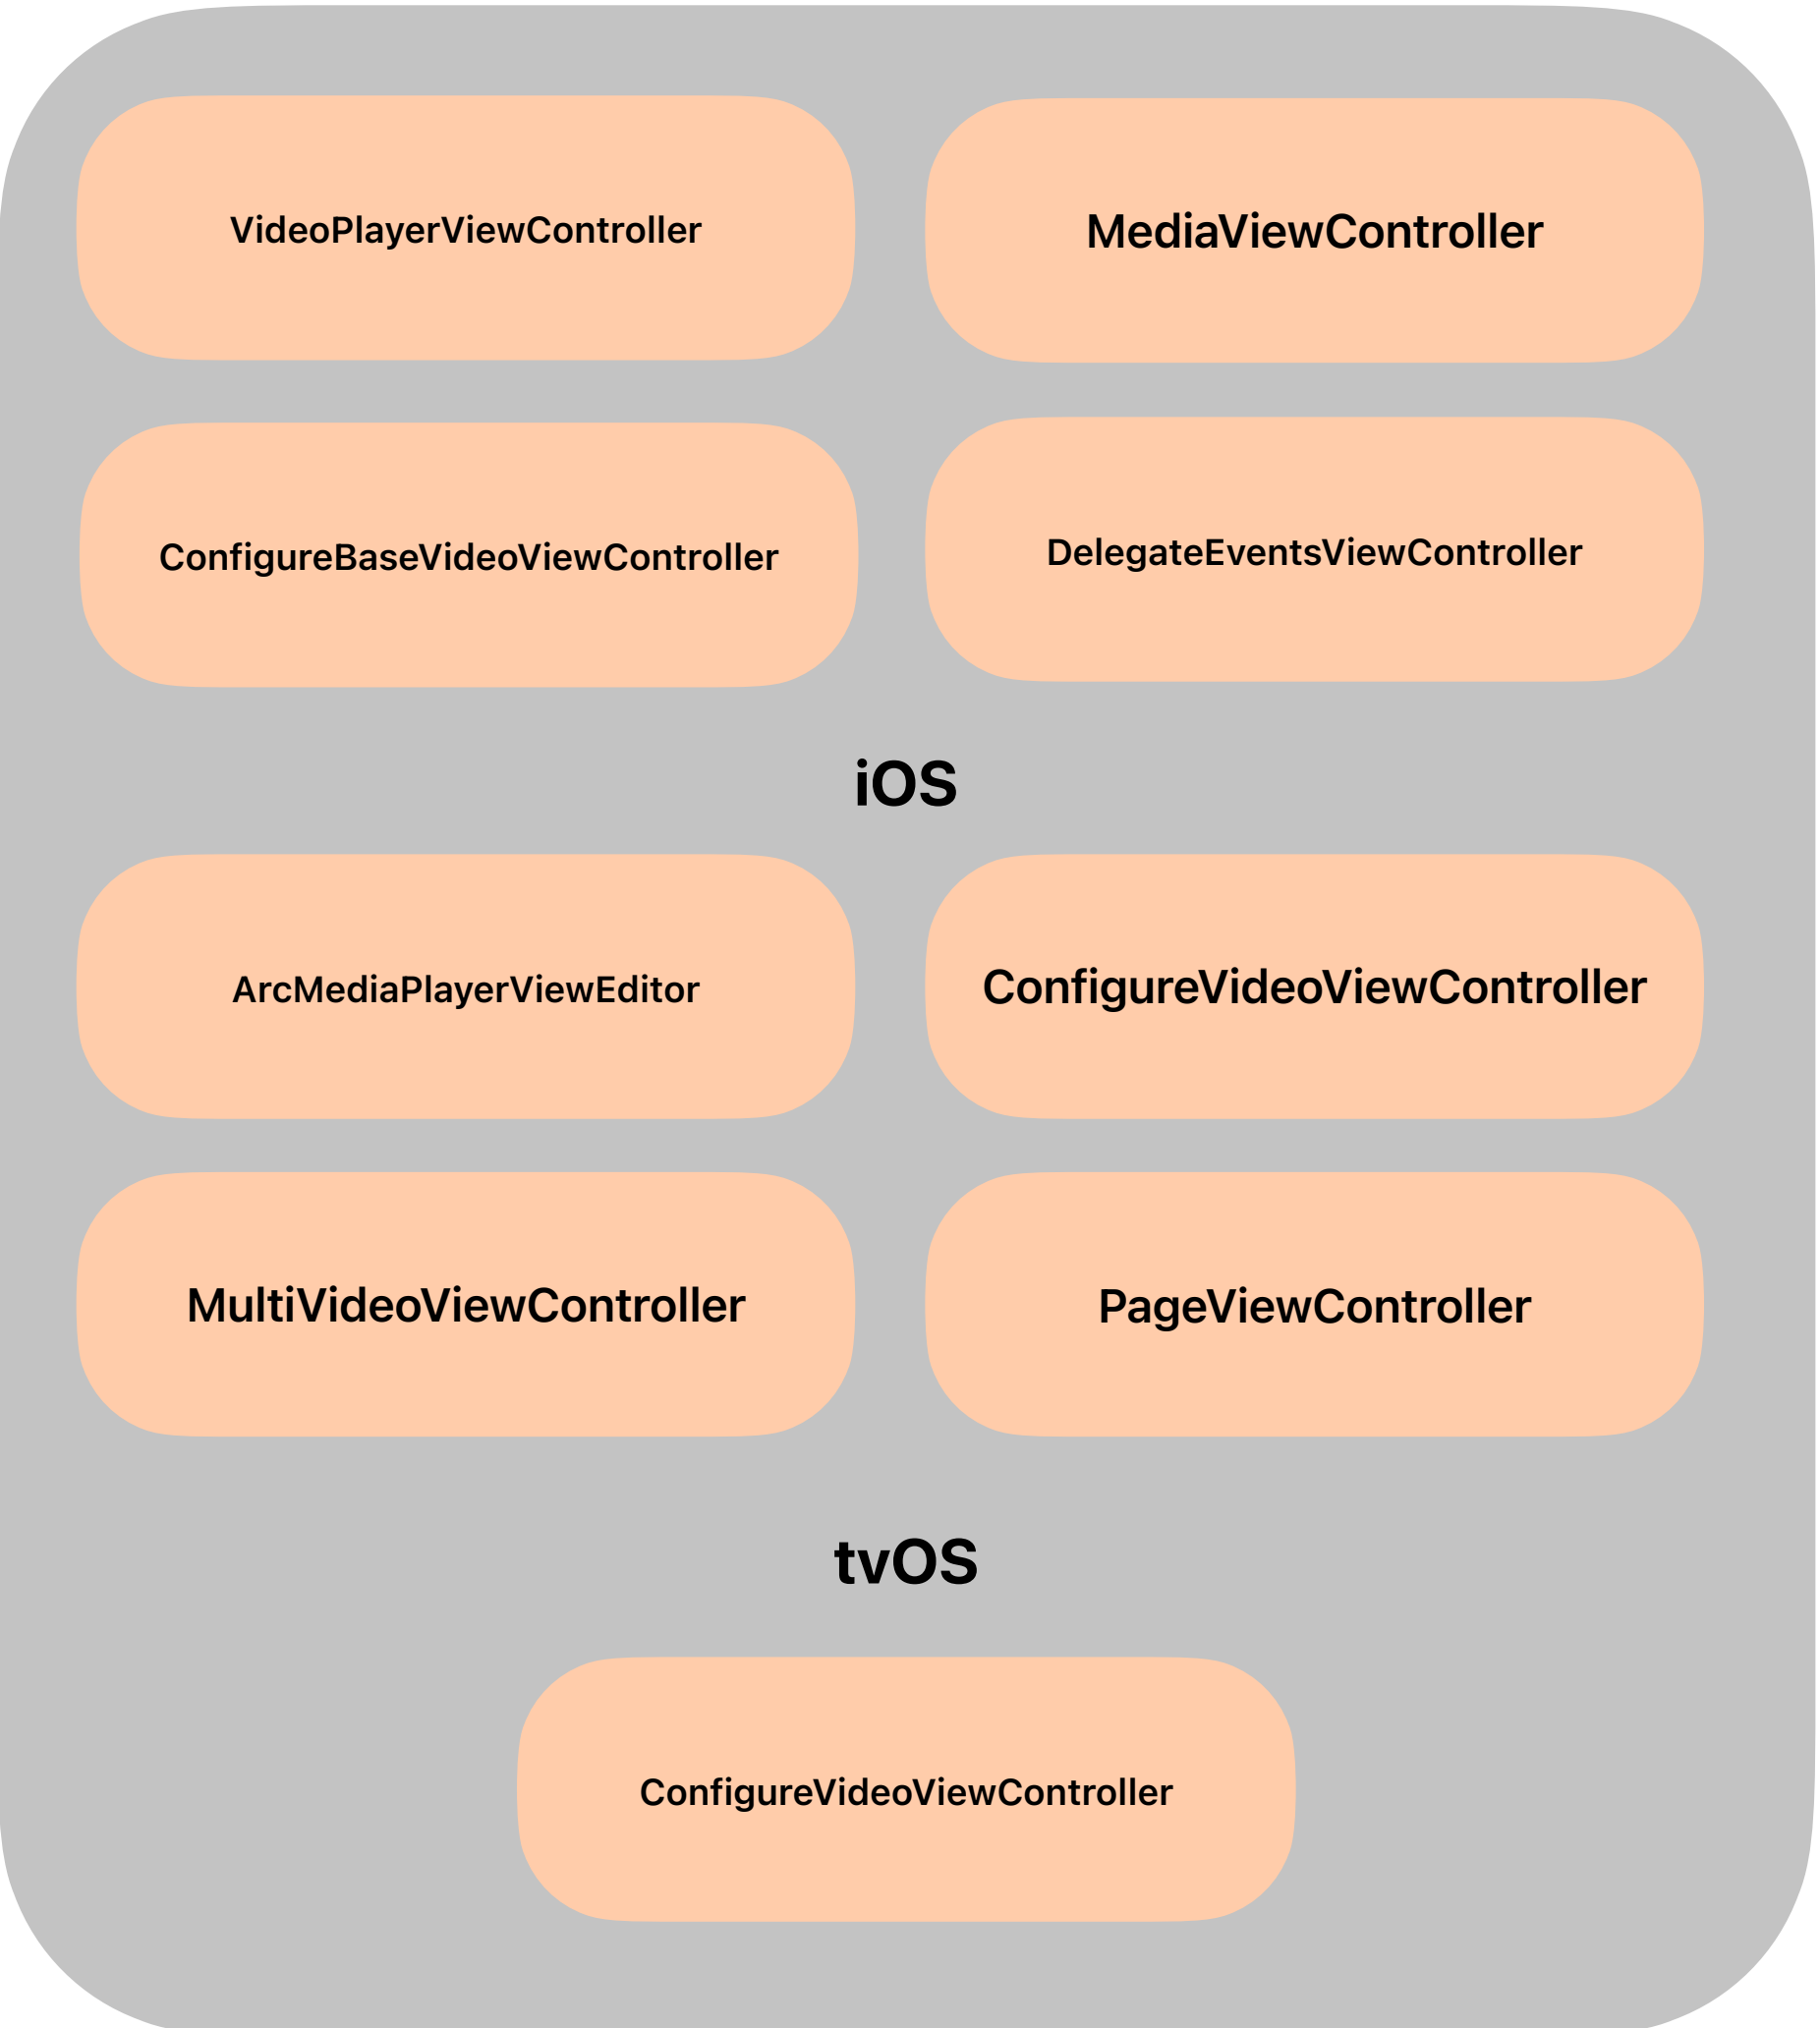

### Configuration and Setup

### Utilities

### Sample App UI

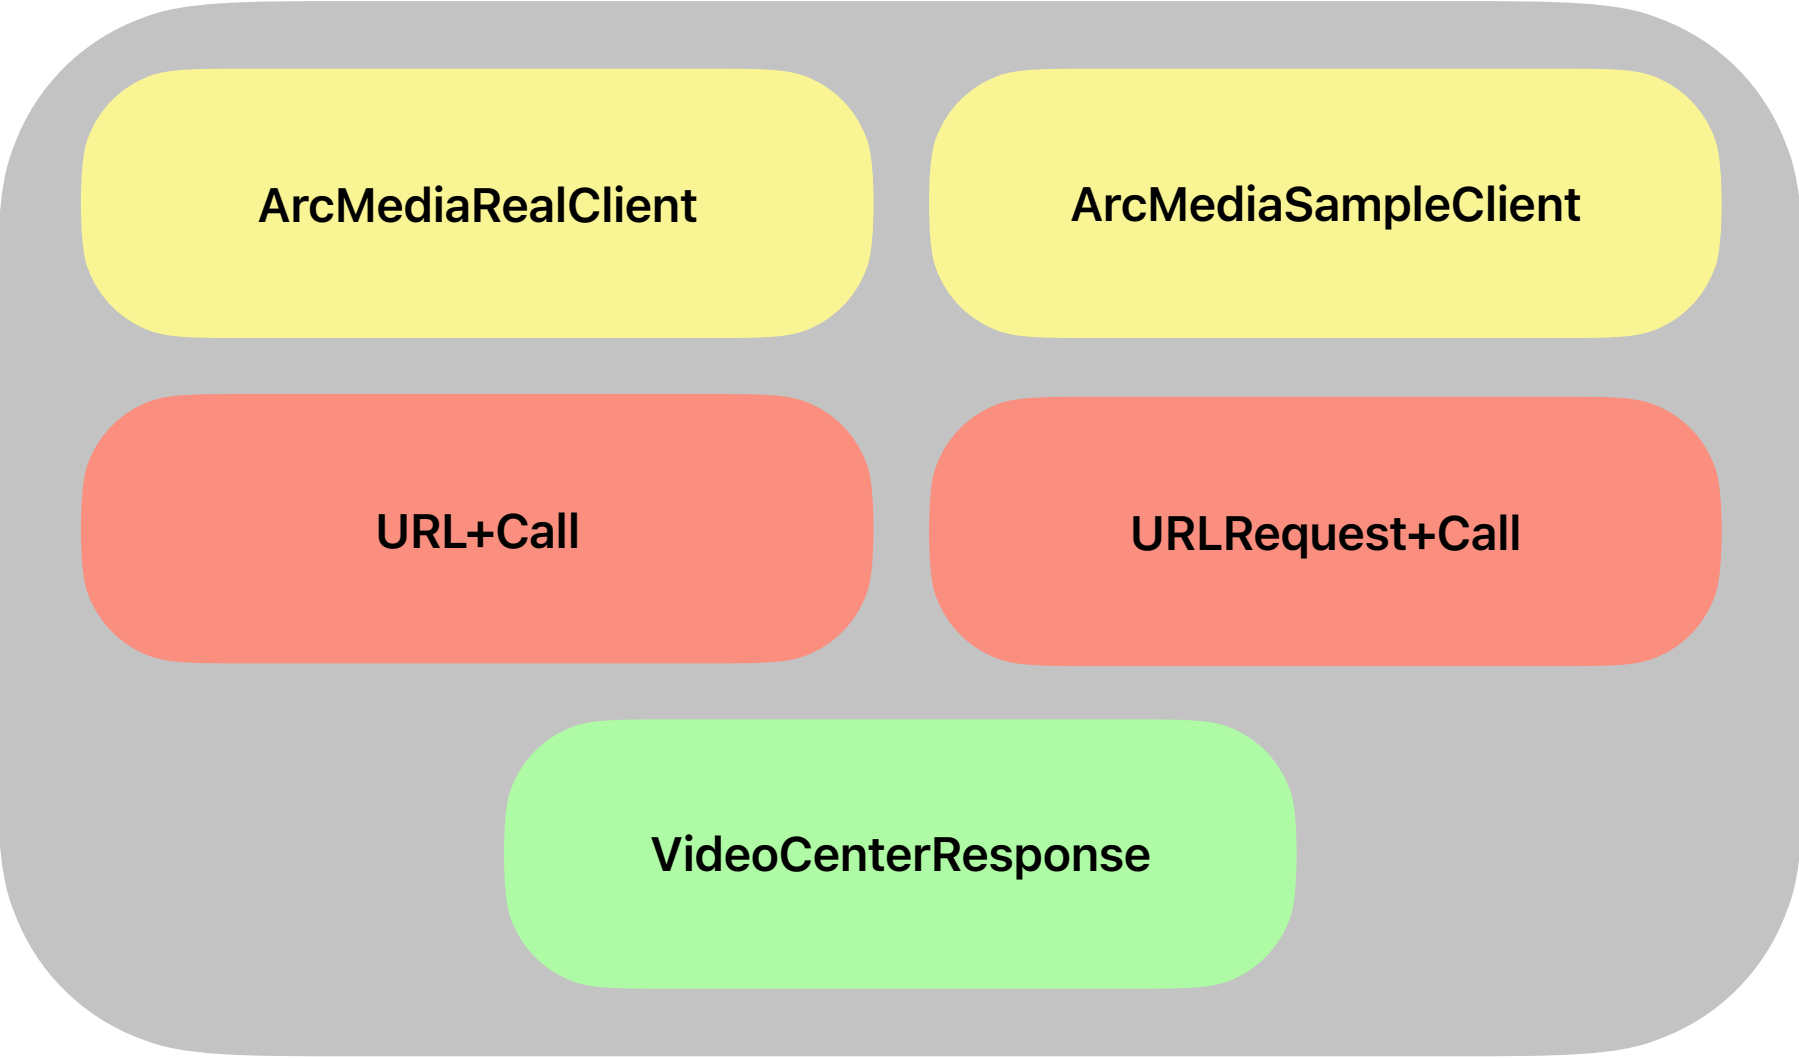

Not included in the unified SDK yet (6/28/23).

Local settings and helpers prop up basic project needs, and Sample App UI helps to set up up a testing interface.

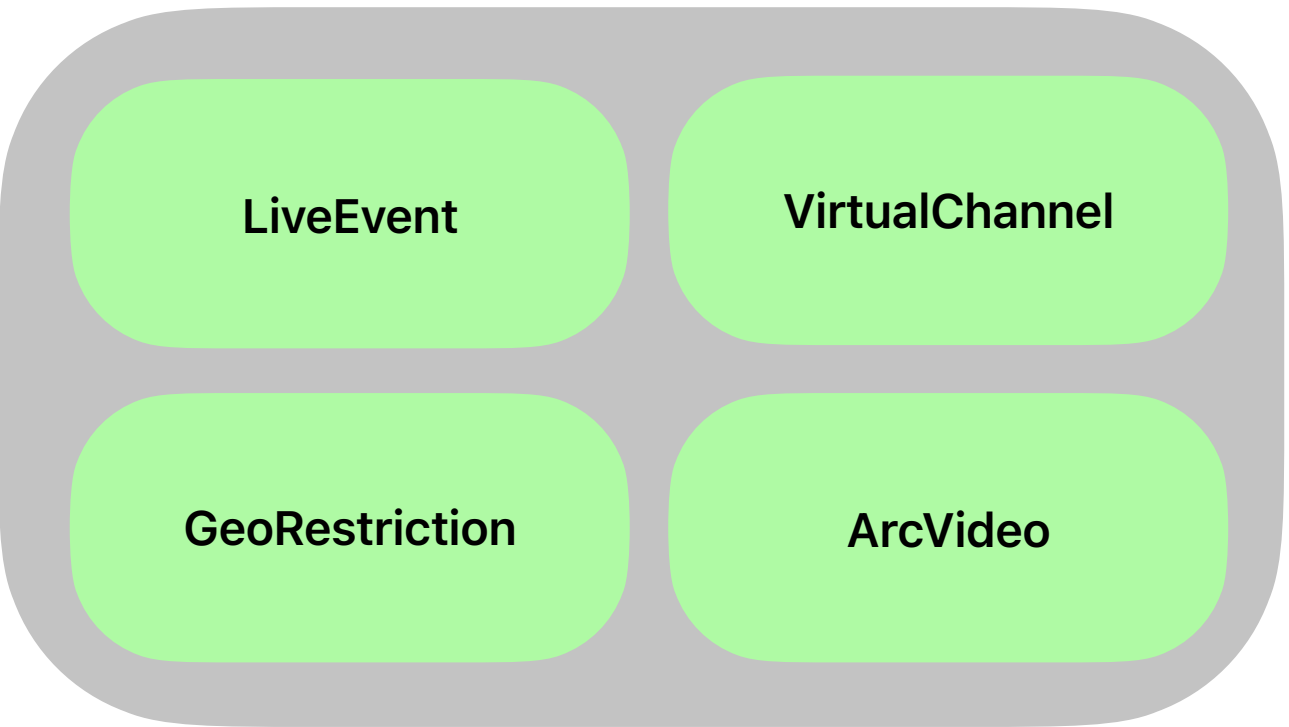

The application proceeds to fetching Arc XP content and ads.

## Content Fetching

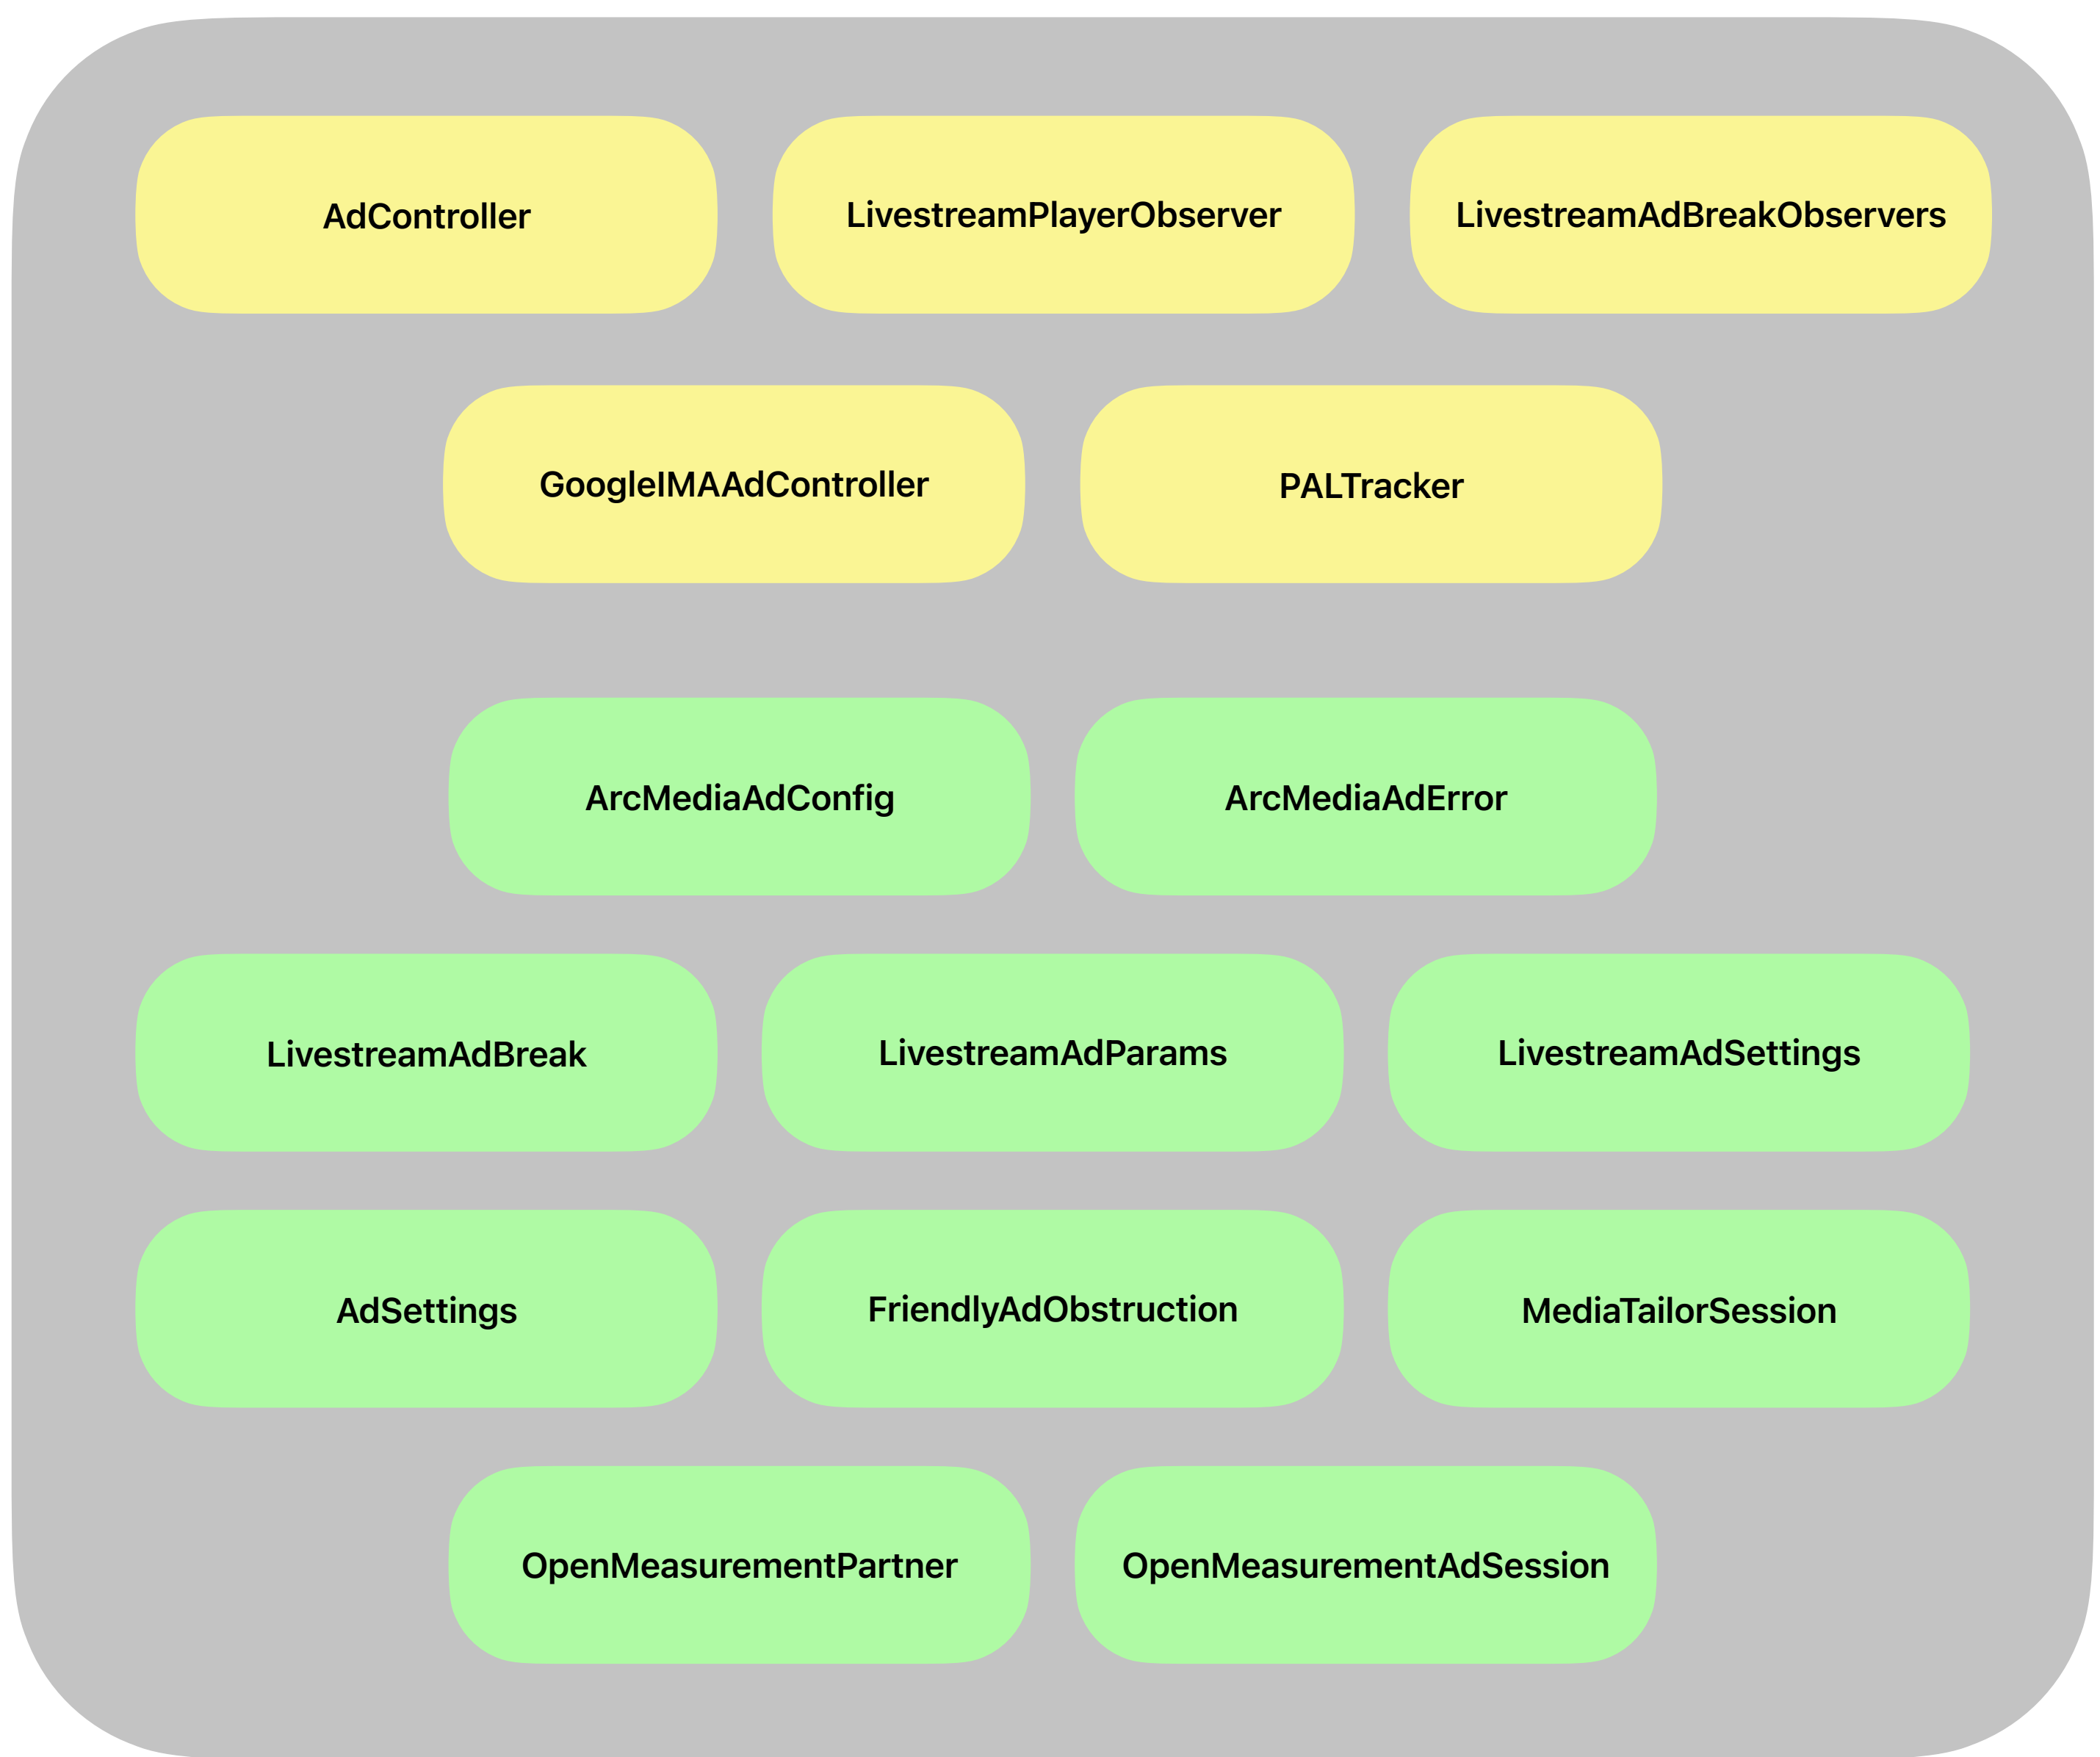

### Networking

### Content

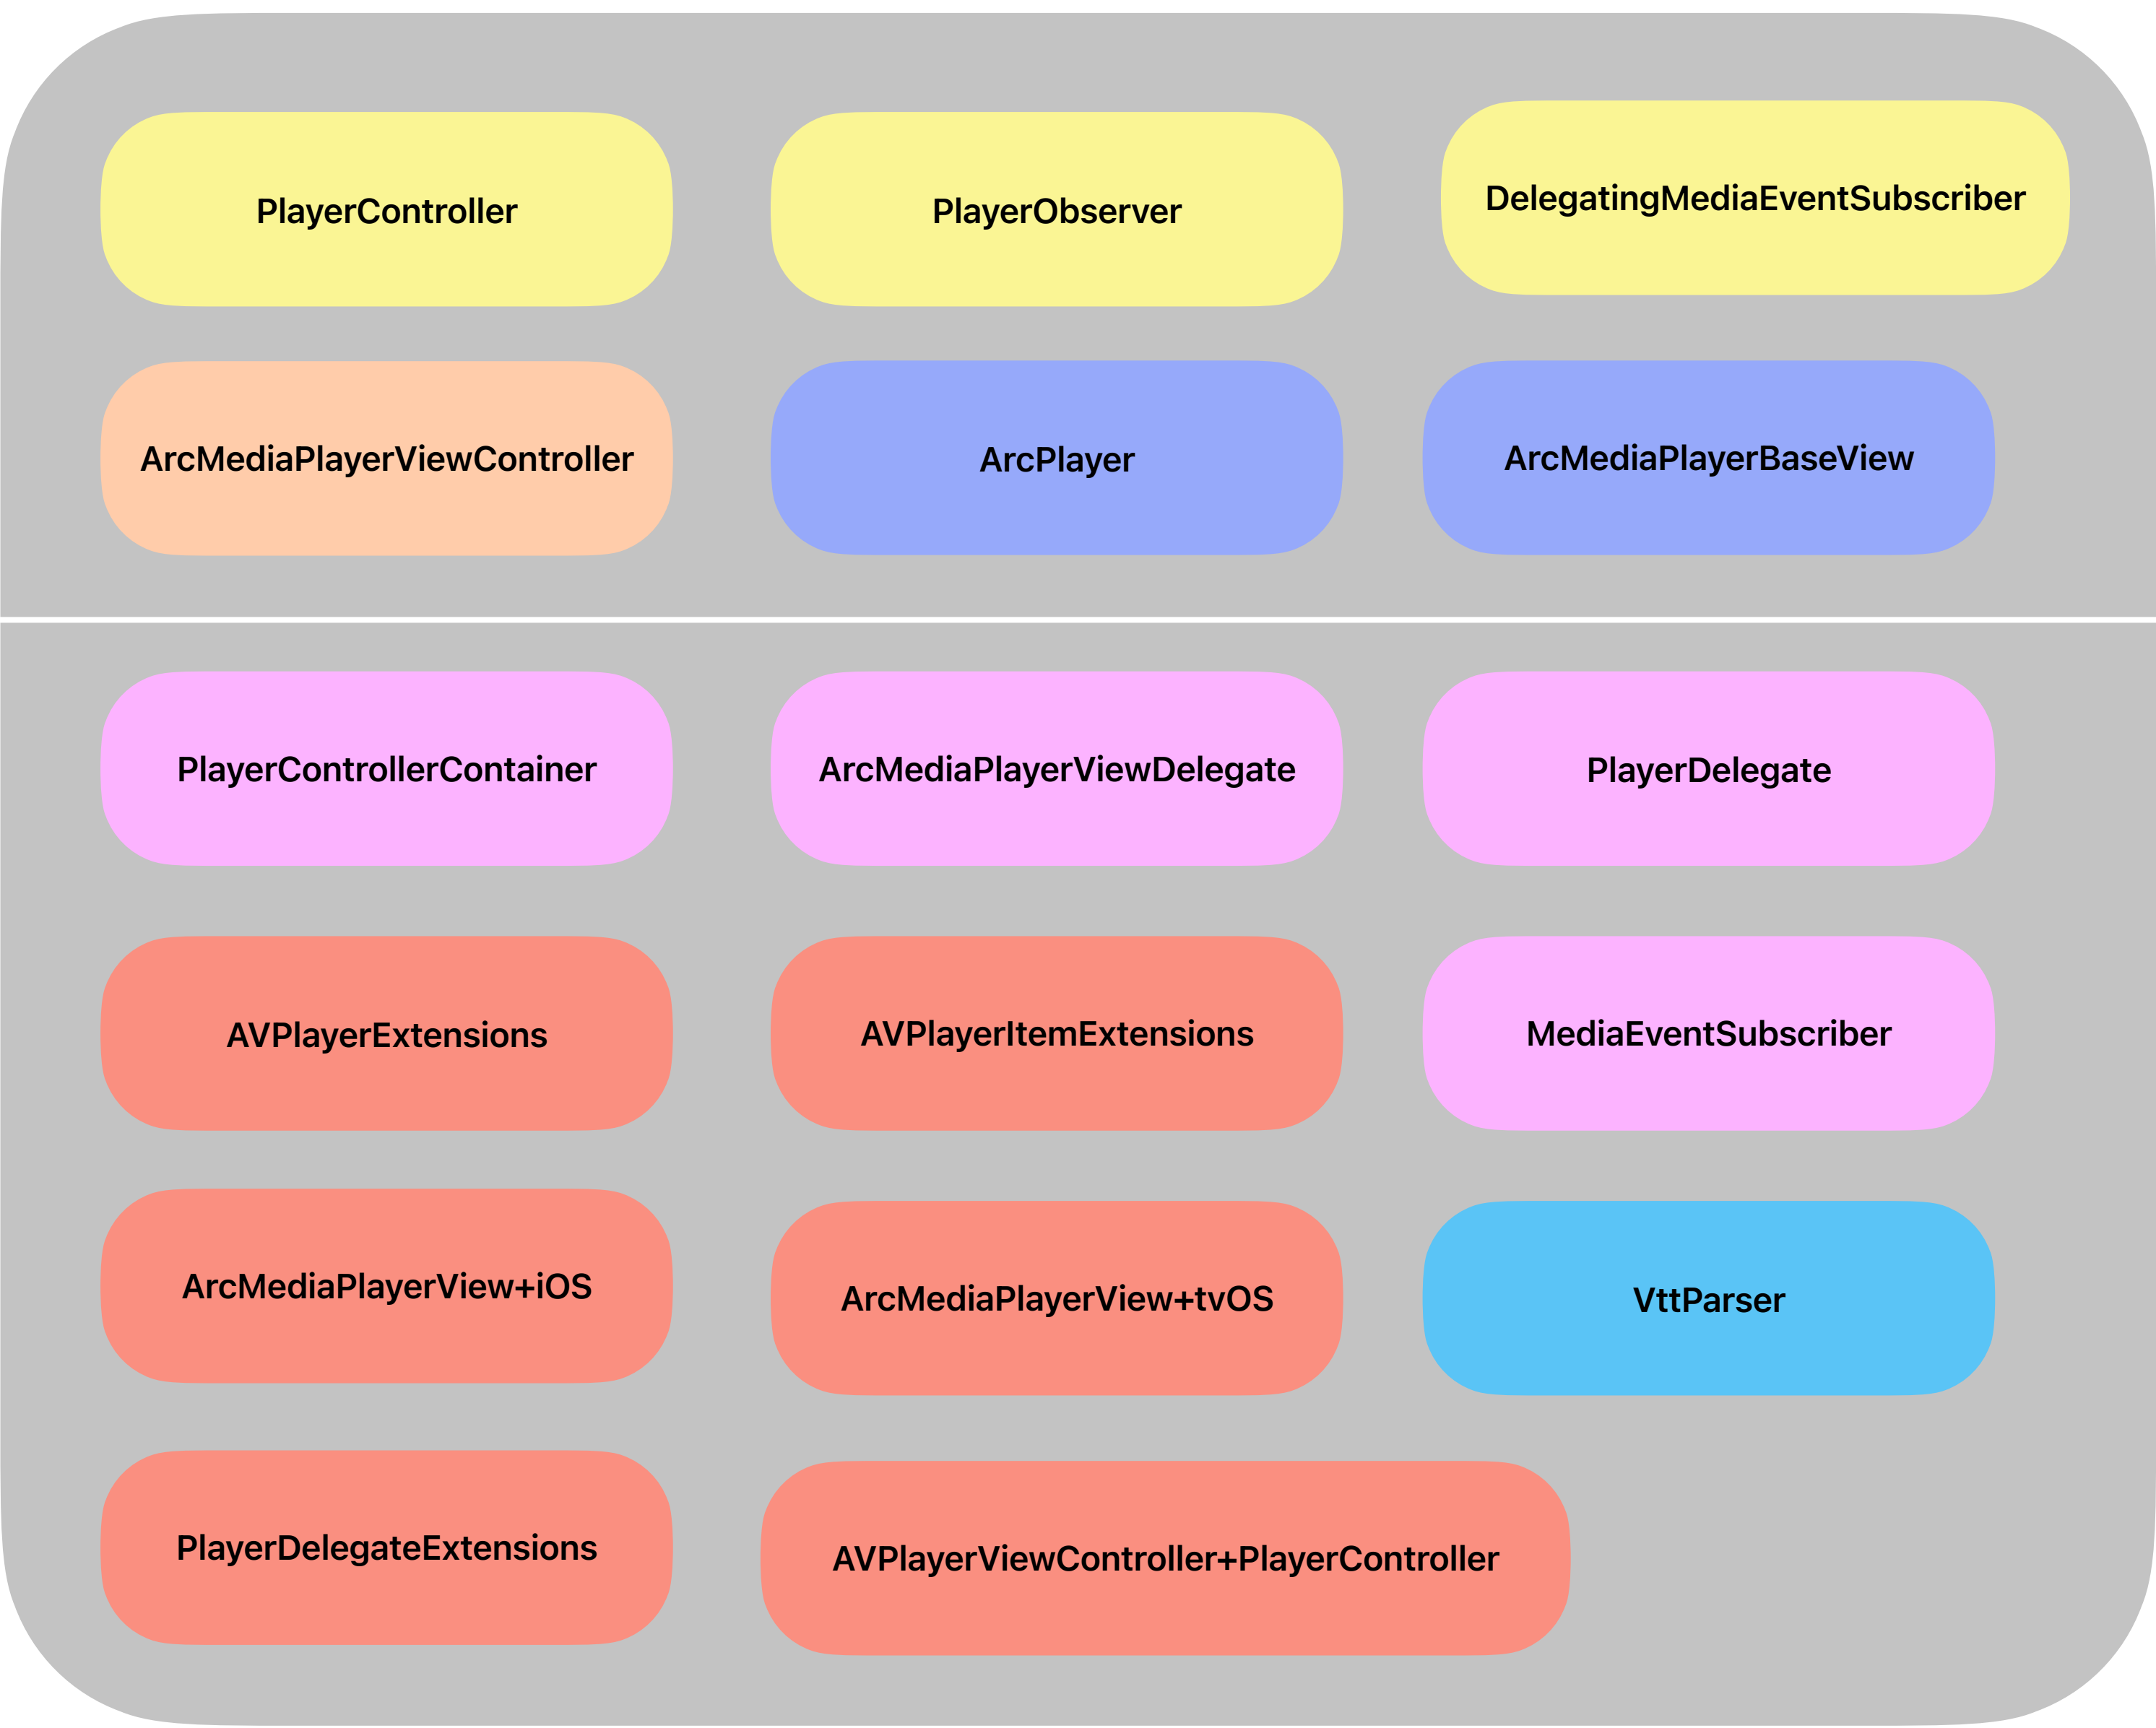

### Ads

After fetching the necessary components, media is displayed with players, and relevant events are reported through delegates.

## Content Display and Event Reporting

### Video Player

### Event Publishers
